

# The best tools, and the best new ideas to make tools work for you

Marc Sommerfeld has been busy in his shop this year, developing still more exciting new cabinetmaking techniques, and the tools to go with them. The new Sommerfeld Tongue & Groove Cabinetmaking System is the latest in a long list of innovations from Marc (see page 12 for details). That list also includes the unique Sommerfeld Cabinetmaking Set, the Raised Panel Set, the Glass Panel Set, and many more. The Tongue & Groove Set delivers perfect cabinet construction with remarkable ease and efficiency.

Backing up Marc's new cabinetmaking technique is a full array of the finest tools and supplies. We offer everything you need to build cabinets and furniture, from the blades that cut your stock to the hardware that provides that final finishing touch. As a brief introduction, we've organized those tools on these pages in an easy-to-understand sequence. If you don't see what you need, please check the table of contents, or give us a call.

## Let's take your project step by step:

### ☐ Saw Blades and Dado Sets

We now offer Sommerfeld's saw blades! The blades shown here are ideal for most cabinetmaking tasks. For precise, splinter-free grooves and rabbets, be sure to check out our new Dado Set.

### ☐ New Katie Jig for dovetail, box joints and half-blind joints

When it comes to drawer construction and lots of other joinery projects, it's hard to beat a good dovetail joint. And it's even harder to beat the quality and accuracy you'll get from the Katie Jig.

"I wanted to take the time to tell you how much I appreciate your great customer service. You went well beyond today's idea of service. I was able to finish the project on time, thanks to you and your idea of what service should be. I really thought that this kind of service died a few decades ago. I will stay a loyal customer for life."  
R.T., Mission Viejo, CA
