**Cabinet Hardware and Installation Jigs**

We've added a big selection of the finest Blum Drawer Runners and Concealed Hinges, so you can completely outfit your cabinet without ever leaving the pages of our catalog. To help you install that hardware, we also offer a number of handy jigs. The Easy Bore jig quickly drills holes for your European-style hinges. For door and drawer hardware use the Easy Mark Jig, and be sure to have a drawer slide jig like "pistol grip" jig for efficient guide installation.

**Doormaking Templates**

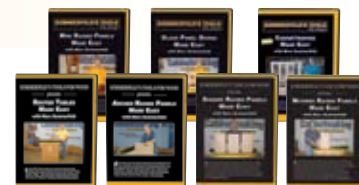

Doors are the defining feature of any great cabinet. Rectangular raised panels are attractive, but arched panel doors really set your work apart from the crowd. We offer molded template sets in five styles for full-size doors, plus a mini template set that works well with the Junior Raised Panel Set.

**Panel and Rail Templates**  
Six complete sets

**Easy Pocket System**

Solid joints are vital to both the appearance and durability of your cabinets. Mortise & tenon or dowel joints are great, but they are difficult and time-consuming. The New Easy Pocket solves those problems by delivering perfect joints quickly and easily. Use the jig for face frame joints and many other applications.
