

SOMMERFELD'S Easy Bore Hinge Boring Jig

Align and bore three perfectly-positioned hinge mounting holes in seconds with this rugged, time-saving wonder

Our hand-clamped boring jig drills a 35mm hole and two aligning 8mm holes at the same setting, which allows you to accurately install your hinges with ease and speed. No screwdriver is needed to install, just a hammer to lightly tap the hinges in place. Hinges have special plastic inserts around screws which stay imbedded in wood; hinge can then be unscrewed if needed while finishing etc. The jig has adjustable stops which allow for different overlays. We use setting number 2 for 1/2"

SHB... Easy Bore Hinge Boring Jig

NEW! Blum Compact Face Frame Hinges

*** Part 38N.3580.08 recommended to be used with SHB Boring Jig & Inserta Template.**

Give your face frame cabinets the quality and performance of concealed European hinges. These top-quality nickel-plated hinges are self-closing, easy to install and even easier to adjust. Blum's new cam depth adjustment and micro side adjustment screw let you align doors in seconds. And when used with Sommerfeld's Easy Bore Jig, the hinge can simply be driven into the 8mm holes. For a complete demonstration of the Easy Bore and more hinge installation information, see our **Cabinetmaking Made Easy DVD**.
